Food Stays Fresher For Longer

Mitsubishi Electric Connoisseur Refrigerators include separate temperature zones, each designed to prolong the wholesome and nutritional quality of a variety of foods, all in the one fridge.

Multi Drawer, Multi Temperature

Multi Drawer technology recognises that different types of food require different temperatures to optimise their freshness. The Connoisseur EX655 model allows independent temperature control of the main refrigerator compartment as well as each of the four drawers. The Connoisseur 2 Drawer models have an Automatic Temperature Control System ensuring different foods are stored at their ideal temperature. Multi drawer, multi temperature customisation means your food will stay fresher for longer.

**REFRIGERATORS
2013**

mitsubishi electric

The Canstar Blue survey conducts research on New Zealand consumers to measure their satisfaction across a range of products and services. The survey found Mitsubishi Electric refrigerators had the most satisfied customers with a perfect five stars for overall satisfaction. Mitsubishi Electric fridges also received perfect five star ratings for value for money, performance & reliability, design and internal layout.

Humidity Drawer
p.11

Freezer Drawer
p.12

Features: MR-C375 & MR-C405

Multi Airflow	Deodoriser with Minus Ion	Super Quiet Operation	Multi Purpose Door Pockets
Three-Way Flexi Shelf	Adjustable Glass Shelves	Multi Purpose Egg Shelf with 1 Egg Rack	Door Alarm
Removable Vegetable Case	Top Tray	Frost Free	Sliding Top Tray
Auto Ice Maker	4 Castors	2 Adjustable Feet	

INNOVATIVE MULTI DRAWER DESIGN

Designed to take frequency of use into consideration, the refrigerator is located at the top, the fruit and vegetable Humidity Drawer is in the middle and the Freezer Drawer is at the bottom. This design minimises the amount of bending required when accessing the refrigerator.

HUMIDITY DRAWER

The Humidity Drawer is designed to maximise the freshness of produce. The drawer features a higher humidity than the main refrigerator compartment and is ideal for keeping fruit and vegetables crisper and fresher for longer. The Humidity Drawer also features a tray at the top ideal for storage and organisation of smaller items such as fruit.

MULTI AIRFLOW COOLING SYSTEM

Cold air is distributed from the back, both sides and front; cooling each compartment quickly and uniformly. Even door pockets are quickly cooled, with air circulating through the gaps in the bottom of each door.

NON-PLUMBED AUTOMATIC ICE MAKER

As there is no separate plumbing connection required, the fridge can be placed anywhere in the kitchen, not just near existing pipe work. Just fill the removable water tank and the Ice Maker is ready to go!

TEMPERED GLASS SHELVES

Built to withstand up to 101 kilograms of weight, practical, easy to clean and adjustable to allow customisation.

SLIDING CHILLED CASE

Perfect for dairy products, fresh fish or meat and chilling drinks. Food is stored at around 0°C ensuring longer lasting freshness.

DOOR ALARM SYSTEM

The Refrigerator Compartment and Freezer Drawer have separate Door Alarms which sound when open for over a minute.

THREE-WAY FLEXI SHELF

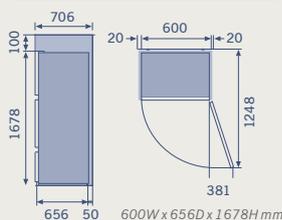

EXCLUSIVE FEATURE

Creates additional room without having to remove a shelf. Slide the shelf halfway back for taller items in front or fold right back to create one large space.

LED TOUCH PANEL

The EX655 refrigerator features an easy to use LED touch panel with eight optional functions to choose from. Each function can be activated using a very simple 3 step process.

- Rapid cool bulk shopping
- Energy saving mode
- Rapid ice making
- Soft freezing or normal freezing
- Stop making ice
- Supercool freezing
- Cool drinks quickly
- Keep vegetables moist

EASY 3-STEP OPERATION

STEP ONE
Touch the home button to bring up the 8 function display.

STEP TWO
Select the mode you would like to activate.

STEP THREE
Simply touch 'Yes' or 'No' to confirm your selection.

INVERTER DRIVEN TECHNOLOGY

The EX655 features Inverter driven technology and "Scene Fit" controls that automatically adjust the energy usage based on user patterns, resulting in cost effective low energy consumption. These energy saving levels can easily be viewed using the Eco Guide display.

ELEVATING SHELF EXCLUSIVE FEATURE

Simply slide the lever to raise or lower the Elevating Shelf by up to 40mm without needing to remove any items from the shelf.

ENERGY EFFICIENCY

Mitsubishi Electric's superior technology has led to the EX655 achieving the Energy Star Mark, the highest efficiency award for a product of its kind in this category.

LARGE CAPACITY – SLIM DESIGN

A specialised thin and efficient vacuum insulation panel offers 10x better performance than conventional insulation. Mitsubishi Electric's highly advanced Vacuum Insulated Panel Technology enables the EX655 refrigerator to achieve a larger internal capacity for maximum food storage while providing smaller external dimensions for a slim, sleek design.

LED SENSORS

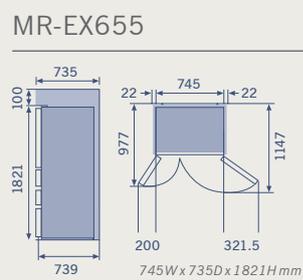

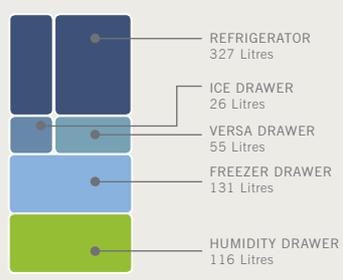

The EX655 features LED sensors in the Refrigerator, Ice Drawer, Versa Drawer and Humidity Drawer to improve the quality of stored items and offer optimal temperature control.

SILENT OPERATION

Due to new Inverter Technology the EX655 refrigerator is the quietest in its class at only 15dBa. This makes it ideal for open plan living.

Connoisseur

REFRIGERATOR COMPARTMENT

FRENCH DOOR DESIGN (EX655)

The MR-EX655 features a French Door Design, which provides significantly more usable space than side-by-side fridges. The design allows for bulkier items, such as catering platters up to 65cm wide, to fit easily in the main Refrigeration Compartment. The other Connoisseur models feature a standard refrigerator door design.

ADJUSTABLE DOOR POCKETS

EGG STORAGE (EX655)

This drawer is specifically designed for storing eggs. Research has shown that when eggs are stored stationary instead of in the fridge door, shelf life and freshness are increased by up to four times due to the lack of vibration.

REMOVABLE AUTOMATIC ICE MAKER WATER TANK

Connoisseur

ADJUSTABLE
DOOR POCKETS

TWO-WAY
FLEXI SHELVES

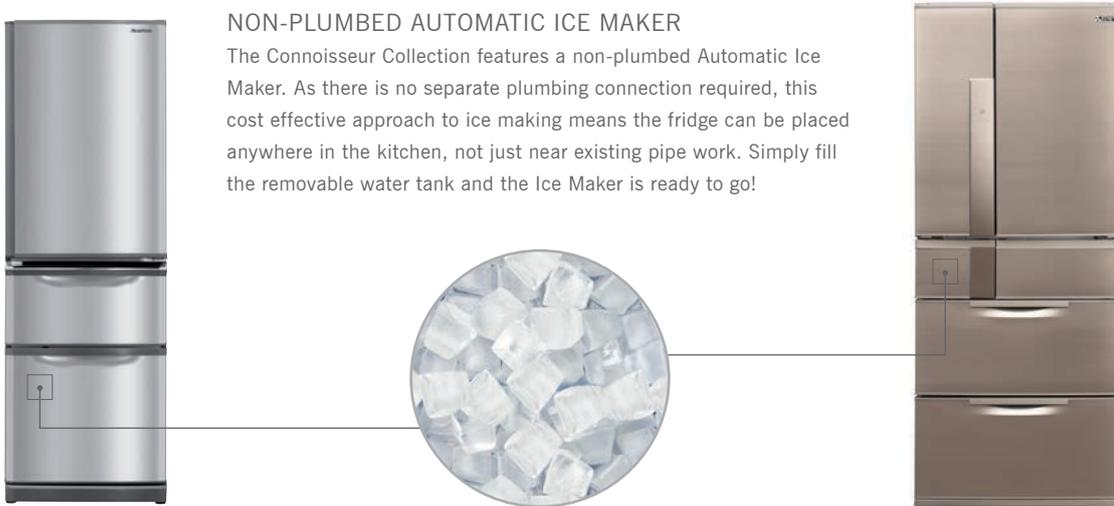

ELEVATING SHELF (EX655)
By simply sliding the shelf lever across, the shelf automatically raises or lowers by 40mm. Great for storing those taller items and there is no longer a need to remove food already stored on the shelf.

SLIDING CHILLED CASE
Ideal for storing and prolonging the freshness of meats, fish and dairy products, the Sliding Chilled Case is set at around 0°C. Also doubling as additional chiller space for canned and bottled beverages, this feature is ideal for summer entertaining.

NON-PLUMBED AUTOMATIC ICE MAKER

NON-PLUMBED AUTOMATIC ICE MAKER

The Connoisseur Collection features a non-plumbed Automatic Ice Maker. As there is no separate plumbing connection required, this cost effective approach to ice making means the fridge can be placed anywhere in the kitchen, not just near existing pipe work. Simply fill the removable water tank and the Ice Maker is ready to go!

REMOVABLE WATER TANK

The water tank, located in the bottom of the Refrigeration Compartment, saves significantly more space in comparison to side-by-side refrigerators, which typically have ice makers integrated in the door design and compromise on available depth. The water tank is easily removed, cleaned and refilled at the kitchen sink without the hassle and additional cost of plumbing the refrigerator into the water supply. This allows bottled mineral water to be used also.

EASY CLEAN SYSTEM

The water supply system is easy to clean; removable water tank components just need to be flushed periodically with water to maintain optimum performance. Rubber components are treated with an anti-bacterial coating.

WATER PURIFICATION (EX655)

Most automatic ice makers require filters to be replaced every 3-6 months and can be a costly exercise. Water in the EX655 Refrigerator tank is purified through a V-LED lamp and lead cleaning filter which removes impurities, bacteria and chlorine to ensure fresh, clean, tasty ice for up to 10 years without needing to replace the filter.

THE ICE DRAWER (EX655)

The separate Ice Drawer ensures ice cubes remain odour free, preventing absorption of lingering food odours that may be present.

VERSA DRAWER (EX655)

VERSA DRAWER

The Versa Drawer offers the ultimate functionality in preserving food quality without losing moisture and taste, making storage more convenient and preparation a breeze even while food is still frozen. The Versa Drawer has two main modes, Supercool Freezing and Soft Freezing. When additional storage capacity is required it can also be utilised for standard freezing.

SUPERCOOL FREEZING

In conventional freezers, once sub-zero temperatures are reached the process of freezing takes place slowly from the surface inwards. Moisture in the food can cause the formation of needle-like ice crystals, resulting in food's texture, moisture and taste being lost.

Supercool mode minimizes cell destruction of the food, locking in moisture, taste and quality. Food is kept in its current state past normal freezing point, then blasted with cool air to start the freezing process instantly, which ensures the food is frozen evenly. Continuing the freezing process from this point, only the finest ice crystals are able to form, preserving the quality of food.

SOFT FREEZING

Soft Freezing allows food to be frozen for up to three weeks in a 'soft' state. This means meat can be easily cut without thawing. Pasta sauces can be stored frozen but kept soft enough to scoop out portions, this is also ideal for left over dips and baby foods.

HOT FREEZING

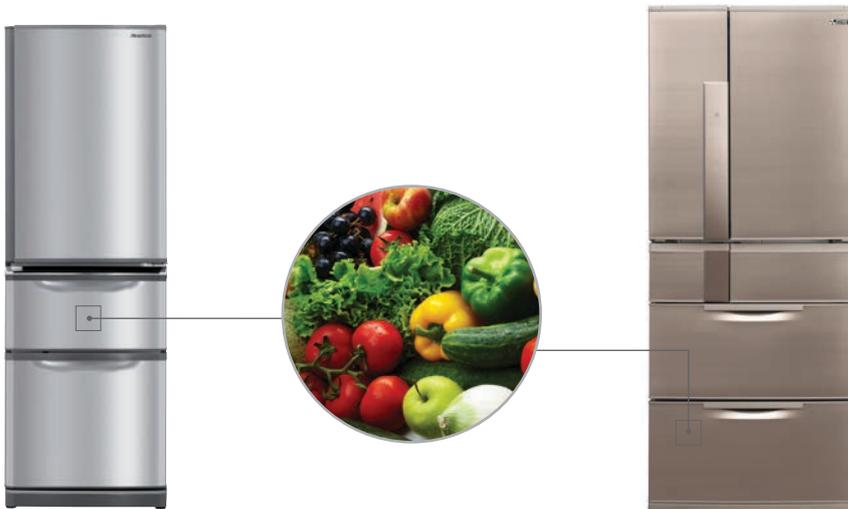

The LED Sensor and Twin Dampers are designed specifically to make it possible to place hot food into the freezer. The LED Sensor automatically detects hot food and adjusts the cold air flow directly onto the hot food from the separate air outlet for added convenience, time saving and to preserve the quality and freshness of the food.

POWER STORAGE

The LED Sensor automatically controls the temperature of stored food, preventing frost and discoloration due to temperature differences within the freezer whilst preserving the freshness and taste of your food.

HUMIDITY DRAWER

HUMIDITY DRAWER

The Humidity Drawer is designed to maximise the freshness of produce. The drawer provides ideal surroundings with a higher humidity than the main refrigerator compartment, ensuring fruit and vegetables stay crisper and fresher for longer.

SLIDING TOP TRAY (EX655)

The Humidity Drawer is divided by a Sliding Tray at the top that can be pushed back to reveal the rest of the drawer. The top tray is ideal for storage and organisation of smaller items such as fruit.

KEEP VEGETABLES MOIST (EX655)

Perfect for leafy vegetables, this function lowers the cooling airflow of the humidity drawer to reduce dryness and increase the moisture levels of your produce, keeping them fresh and crispy.

VITAMIN FACTORY (EX655)

The unique Vitamin Factory LED lighting system is designed to slow down the wilting process of produce and maintain the original vitamin and anti-oxidant levels for longer. Vegetables and fruit stored in the specially designed Humidity Drawer with integrated Vitamin Factory LED System will last significantly longer in comparison to conventional vegetable crisper bins.

FREEZER DRAWER

THE FREEZER DRAWER

The Freezer Drawer is divided by a Sliding Tray at the top that can be pushed back to reveal the rest of the freezer drawer. The Freezer Drawer is roomy enough to fit bulky items such as ice cream tubs, loaves of bread and frozen vegetables. The top tray is ideal for storage and organisation of flat pack items such as meat packs.

RAPID COOL (EX655)

While Rapid Cool is active, the EX655 will monitor the opening of the freezer, vegetable and refrigerator compartments to detect which area has increased contents, and quickly cool the items. This locks in flavour and preserves the quality of food.

L4Grande LARGE CAPACITY 4 DOOR MODEL

MR-L710

MR-L710
710 Litres

At an impressive 710 litres, the L4 Grande is designed for larger living. With an internal width of 800mm this refrigerator provides you with maximum storage capacity for grocery types of any size ensuring you will never be caught short of space. A French Door Design also allows for significantly more usable space when compared to a side-by-side fridge, particularly for bulkier items such as wide platters.

The L4 Grande features an ergonomic 4 door layout designed to reflect the most frequently used fridge spaces. This is combined with a two tone finish to create a user friendly refrigerator with a stylish exterior design.

Although design is key to this model, Mitsubishi Electric's superior technology has not been compromised. The L4 Grande has achieved the Energy Star Mark, the highest efficiency award for a product of its kind in this category.

TEMPERED GLASS SHELVES

Heat resistant, easy to clean, and adjustable to allow for customisation, these shelves have also been built to withstand up to 101 kilograms of weight.

ADJUSTABLE DOOR POCKETS

UTILITY CASE

The utility case is perfect for separating dairy products, fresh fish or meat and chilling drinks.

THREE REVOLVING ICE TRAYS

ERGONOMIC DESIGN

Stylish aluminium handles provide space for a comfortable grip.

TWIN FAN MULTI AIRFLOW

Twin ventilator fans blow and circulate air at various levels throughout the refrigerator and freezer compartments. This allows for even cooling distribution and keeps food fresher for longer.

Features: MR-L710

Twin Fan Multi Airflow	Utility Case	Vegetable Compartment	Egg Tray	Capsule Door Pocket	Large Bottle Pockets	Adjustable Door Pockets	Tempered Glass Shelves
Frost Free	Ice Box	Revolving Ice Trays	2 Adjustable Feet	4 Castors	Eco Mode	Anti-Mould Gasket	Rapid Cool
External LED Control Panel	Anti Bacteria & Active Bio Deodoriser	Whisper Quiet Operation	CFC Free Cooling System	Neuro Fuzzy Logic	Child Lock	Auto Closer	

CAPSULE CASE

LED CONTROL PANEL
 Customise the temperature to keep food fresher for longer. The L4 Grande features four smart operation modes including Eco Mode, an energy saving setting which maintains an even desired temperature and Rapid Cool, which cools quickly to preserve the freshness of food.

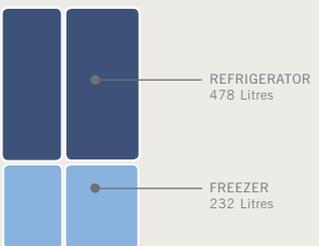

VEGETABLE COMPARTMENT
Humidity Case
 Adjustable Humidity Control allows customisation of the compartment to create the ideal environment for fruit and vegetables to stay fresher and crisper for longer.
Vitamin Factory
 The unique LED lighting system is designed to slow down the wilting process and maintain vitamin and anti-oxidant levels for longer.

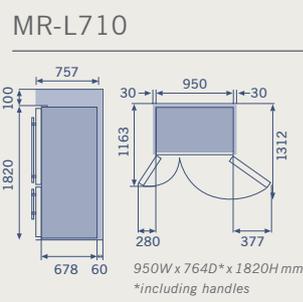

LARGE BOTTLE POCKETS

FREEZER CASES
 The L4 Grande features a large 54L compartment providing ample storage for frozen foods. Three smaller storage cases complete the freezer providing further storage and easy organisation of food.

REFRIGERATOR
478 Litres

FREEZER
232 Litres

ADVANCED DRAWER TECHNOLOGY

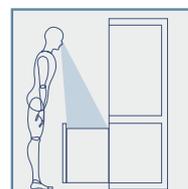

Building on the success of the Connoisseur Multi Drawer Refrigeration Range, Mitsubishi Electric's unique range of refrigerators featuring a bottom mounted freezer drawer allow the advantages of Drawer technology to be incorporated into our Classic Collection.

The Bottom Mount Advantage

Mitsubishi Electric has recognised the growing popularity of bottom mounted freezers and expanded this range to include three models. The Freezer Drawer on these models is generously proportioned, with 105 litres of usable space, to suit the needs of modern New Zealand families.

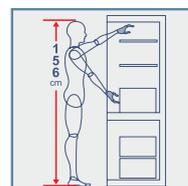

Ease of Use

This range is popular among those who access the Refrigerator Compartment most commonly, while making the freezer as user-friendly as possible. The drawer-type freezer allows quick and easy selection of food items, with a top tray that slides back to reveal more storage and ultimately improves energy efficiency by minimising the amount of time spent with the door open.

Ergonomic Design

With the larger Refrigerator Compartment located at the top, the layout of these models take frequency of use into consideration, minimising the need for users to bend to reach refrigerated food items. The drawer design of the freezer allows users to select food from above, without the need to bend or kneel to access this compartment.

Reduces Loss of Cool Air

As only part of the freezer compartment is exposed when the drawer is opened, the loss of cold air is minimised.

Frost Free

The freezer is Frost Free, ensuring the compartment is automatically kept clear of ice build-up at all times.

FROST FREE FREEZER

Say goodbye to manually defrosting your freezer. The Mitsubishi Electric Frost Free Freezer automatically prevents ice build up.

SLIMLINE UPRIGHT DESIGN

The modern Slimline Design features a door that opens beyond 90 degrees, allowing for the easy removal of drawers for cleaning.

TRANSPARENT DRAWERS

Allow for quick and easy selection of items, minimising the amount of time spent with the door open, reducing the loss of cold air and saving energy.

RAPID FREEZE MODE

To freeze items quickly, simply press the "Rapid Freeze" button to activate the special fast-freeze cycle, locking in freshness.

ENERGY EFFICIENT DESIGN

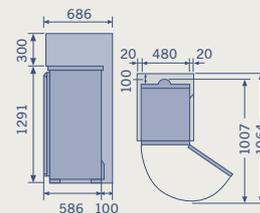

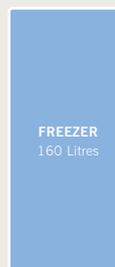

The External Temperature Control Panel allows adjustments to be made easily without losing cool air.

The Multi Purpose Sliding Cases keep the freezer cooler by minimising loss of cool air.

The Aluminium Tray speeds up freezing time, and is especially effective for quickly freezing large bulky items when using Rapid Freeze Mode.
