CLIMAVENETA'S MISSION

Climaveneta's mission is to provide energy efficient heating, air conditioning, and optimisation solutions that enhance everyone's comfort, improve the profitability of a building, and do not contribute to an increase in CO₂ levels.

As a European leader in the HVAC industry, Climaveneta has provided premium air conditioning and heating solutions for the most challenging and demanding projects worldwide for over 45 years. Building on this strong legacy, Mitsubishi Electric Hydronics & IT Cooling Systems S.p.A. has decided to turn Climaveneta into the Group's specialized brand for hydronic comfort applications.

The result is the most complete range of advanced solutions providing enhanced usability, energy

efficiency, and environmental sustainability to modern buildings, as well as for the health, and well-being of the people who spend their time there.

These solutions are backed by a business approach based on flexibility and capability to adapt the system to the requirements of each project, as well as on vast experience and on the strength of belonging to a large multinational group such as Mitsubishi Electric in terms of integrated R&D, operations and central functions.

Leadership in smart heat pumps for 4 and 6 pipe systems

Extensive Range of Hydronic units

from 1 to 4.549kW

Complete range of rooftop units up to 350kW and AHUs up to 100.000m3/h air flow

Vast portfolio of Control, Monitoring and Optimisation systems

12 specialized manufacturing hubs

Countless succesful projects worldwide

standard energy efficiency settings

standard noise reduction configurations

Sales network

Manufacturing hubs or R&D labs

Climaveneta solutions for comfort applications are designed to provide even in the most challenging residential, office, hotel and retail projects:

Perfect Comfort and Well-being

Ensuring a perfect control of temperature, humidity as well as of air quality and noise level, ideal comfort conditions are ensured even in the most demanding applications and challenging climate conditions.

Environmental Respect

Decreasing energy consumption, cutting carbon emissions and making the most extensive use of renewable sources are key elements of a high quality HVAC, making a positive contribution to greener buildings and better energy performance ratings.

Specific Solution for each project

A vast range of highly configurable products, combined with solutions dedicated to each project, when even the highest configurability is not enough, is key to delivering best comfort with no limitations on architectural choices, reduced footprint of technical systems and no aesthetical impact.

Lowest cost of ownership

Thanks to cutting-edge solutions designed around technological innovation and sustainability in order to drive down initial investment, running costs and maintenance, and to increase the total life cycle of the product.

Simplified on-site operations

Climaveneta units apply a "plug & play" design approach that integrates many functions traditionally provided by different systems, such as heating and cooling. They are equipped with all options and accessories in order to make on site operations rational, simple and predictable, with countless advantages in project management.

Enhanced value of the real estate development

By reducing operational expenses due to running costs and maintenance, as well as by optimising initial investment and opening the opportunity to benefit for energy reduction and green solutions incentives, Climaveneta solutions are a key asset in making new or existing properties more valuable and profitable.

CHILLERS

- ▶ Highest energy efficiency
- Perfect indoor climate control
- ▶ Lowest noise emissions

ADVANCED TECHNOLOGIES FOR HIGH EFFICIENCY AND HIGH QUALITY AIR CONDITIONING SYSTEMS

Climaveneta's leadership in air conditioning and heating is backed by over 45 years experience in the smart integration of premium technologies for the most challenging projects worldwide

R R513A

Magnetic Levitation

An extended range of chillers with magnetic levitation centrifugal compressors from 200kW to 4MW, both air source and water source, available also in free cooling and evaporative free cooling versions, to deliver highest efficiency in every application.

HEAT PUMPS

- Operating limits up to -20°C
- Hot water production up to 78°C
- **Highest energy efficiency**

GO5 SERIES

R R513A Air and water source heat pumps with R513A

Inverter Driven Compressor

The possibility to modulate cooling capacity results in increased efficiency as well as in the possibility to effectively implement smart management solutions such as active redundancy.

New G04 and G05 Series using green refrigerants

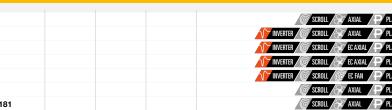

R513A

1234ze

Following on vast experience in using green refrigerants, Climaveneta has already employed extensively green HFO refrigerants such as HFO1234ze and R513A in many ranges. in order to continue to be at the forefront with green best practices.

Smart Thermal Energy Management

An innovative heat recovery system that allows the smart use of rejection heat from the industrial process for comfort heating and other neighbouring applications.

UNITS FOR SIMULTANEOUS AND INDEPENDENT PRODUCTION OF HOT AND COLD WATER

- Highest efficiency in combined hot and cold water production
- Rationalized system design and reduced footprint

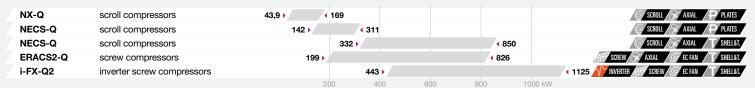

Air source heat pumps

Water source heat pumps

G05 SERIES / Air and water source 4-pipe heat pumps with R513A 🕕 🚯 I3A

ROOFTOP UNITS

- Widest range and complete configurability
- Perfect thermoigrometric control
- Maximum flexibility in the air flow management

Remote condensers

The VPF (Variable Primary Flow) dynamically optimizes the unit's thermoregulation for variable flow operation, thus ensuring both the highest pump energy savings and chiller stable operation.

High Water Temperature

Climaveneta vast experience in high leaving water temperature applications is proven by a complete range of technical solutions in these areas, to cope with any heating requirement, from 6 pipe applications to high temperature heating.

V-AIR

High efficiency EC technology fans are extensively adopted for their advantages with 15% energy reduction compared to traditional EC fans.

HYDRONIC TERMINALS

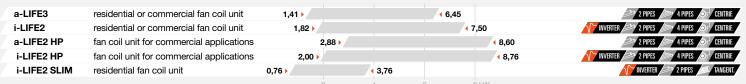

- > Fan coil range for residential and commercial applications
- Complete range of accessories
- ▶ For exposed or concealed installation

Group devices

ClimaPRO Plant Room Optimisation System

Plant Room Optimiser for real time, smart management of energy indeces for the single units and the entire plant room.

MANAGER 3000 Specialized group control.

SEQUENCER

The ultimate solutions for supervision, remote monitoring, service, and preventive maintenance.

Supervision and monitoring systems

▶ IDRORELAX

Monitoring and supervision system.

Human Machine Interfaces

KIPlink

Control interface for smart phones and tablets.

Proprietary Control Logics

The performance of Climaveneta units is enhanced also by their control logics, based on a proprietary logics and know-how, deployed in a vast range of solutions.

Leading Heat Recovery Technology

Climaveneta is a recognized leader in heat recovery applications and in its product employs in the most effective way all the most performing solutions such as thermodynamic, plate and rotary heat recovery as well as refrigerant booster.

Configurable Efficiency Set

The willingness to cope even with the most demanding energy efficiency projects is reflected by the availability of 3 energy efficiency standard configurations in most hydronic units.

Eco Changes is the Mitsubishi Electric Group's environmental statement, and expresses the Group's stance on environmental management. Through a wide range of businesses, we are helping contribute to the realization of a sustainable society.
