LX Designer French Door Range

The LX Slim French Door is the perfect solution to upgrade your kitchen without a full renovation. At 699mm wide, it fits the standard Kiwi kitchen cavity, offering French door luxury in a compact form. For extra storage, the LX564 French Door provides a generous 564-litre capacity while retaining its sleek glass panel design. Both models feature advanced Inverter Technology, blending style and functionality seamlessly.

LX Slim – The Perfect Fit

Fit more into a smaller footprint with the LX Slim French Door Series – a sleek and compact addition to Mitsubishi Electric's popular French Door Multi Drawer line-up, now featuring a space-efficient 442L capacity. Designed with the classic Kiwi kitchen in mind, this model measures just 699mm wide, making it an ideal fit for standard kitchen cavities.

LX564 – Designed for entertaining

The LX French Door Series is designed to impress with its size and functionality. Offering a spacious 564-litre capacity, it is perfect for big families and entertainers who need room for everything – from weekly groceries to party platters. The French Door design provides easy access and better organisation, ensuring everything is within reach when needed.

Glass Door Finish

Designed to make a statement, the LX Designer French Door Range features stunning glass flat panel doors in a range of modern colours, presenting a striking finish. The toughened glass panels not only look great, they are easy to clean and dent resistant!

Advanced Inverter Technology

The use of super-efficient Inverter Technology combined with monitored temperature sensors installed throughout the refrigerator makes the LX Range one of the most efficient in New Zealand. With Neuro Fuzzy Logic Technology, the LX Range learns from and adapts to your lifestyle, optimising output for unparalleled energy efficiency.

Whisper Quiet

The LX Designer French Door Range is whisper-quiet, ideal for open plan living spaces where low noise is key.

Supercool Chilling Case

Keep meat and fish fresher for longer without having to freeze them. The Supercool Chilling Case is ideal for storing fresh meat for up to seven days and fresh fish for up to five days without the need to freeze.

*400 – 499L French Door Multi Drawer Category

**500 – 599L French Door Multi Drawer Category

Vitalight Humidity Drawer

The Humidity Drawer is designed to maximise the freshness of produce. This drawer provides the ideal storage environment for fruit and vegetables by maintaining higher humidity than the main Refrigerator Compartment, so fruit and vegetables stay crisper and fresher for longer.

Slimline Top Shelf

The Humidity Drawer contains a compact upper shelf that is ideal for storing smaller, easily damaged items such as berries.

Vitalight Technology

The unique Vitalight Amber LED Lighting System is designed to slow down the wilting process of leafy greens, maintaining their original vitamin and antioxidant levels for longer. Fruit and vegetables stored in the specially designed Humidity Drawer with its integrated Vitalight Amber LED System will last significantly longer in comparison to conventional vegetable crisper bins.

Non-plumbed Automatic Ice Maker

Our Non-plumbed Automatic Ice Maker ensures you'll always have fresh, clean ice. As there is no separate plumbing connection required, this cost-effective approach to ice making means the fridge can be placed anywhere in the kitchen, not just near existing pipe work. Simply fill the removable water tank and the Ice Maker is ready to go!

Removable Water Tank

The water tank located at the base of the Refrigeration Compartment saves significantly more space than in-door ice makers which compromise on available depth. The water tank is easily removed, cleaned and refilled at the kitchen sink without the hassle and additional cost of plumbing the refrigerator into the water supply.

Easy Clean System

The entire water supply system is easy to clean. The removable water tank components just need to be flushed periodically with water to maintain optimum performance and prevent the build-up of grime.
